INCOMPATIBILITY (MATERIAL TO AVOID): Alkaline materials, strong acids and oxidizing materials. SECTION VII - SPILL OR LEAK PROCEDURES STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: Eliminate ignition sources; provide good ventilation; dike spill area and add absorbent material to spilled liquid. Increasing the Material and mix. ASSTE DISPOSAL METHOD: Locilect absorbent/water/spilled liquid mixture into metal containers and add enough water to cover. Consult local, size and federal hazardous waste regulations before disposing into approved hazardous waste landfills. Obey relevant laws. SECTION VIII - SAFE HANDLING AND USE INFORMATION RESPIRATORY PROTECTION: Amen spraying and/or printing this material, use a nicsh-approved cartridge respirator or gas mask suitable for airborne mixts and vapor concentrations below the time-weighted threshold limit values. When using in poorly ventilated and confined spaces, use a fresh-air supplying respirator or a self-contained breathing apparatus. VENTILATION: General mechanical ventilation or local exhaust should be suitable to keep vapor concentration below TLV. Ventilation equipment must be explosion proof. PROTECTIVE GLOVES: Impermeable chemical handling gloves for skin protection. PROTECTIVE GLOVES: Impermeable chemical safety glasses, goggles and face shields for eye protection. PROTECTIVE GLOVES: Impermeable chemical safety slasses, goggles and face shields for eye protection. PROTECTIVE GLOVES: Expermeable sprons and protective clothing when ever possible to prevent skin contact. The use of head caps when ever possible is strongly recommended.
